### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4, 11, 13-16, 18, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reed (US 5,178,563) in view of Janssen et al (US 6099324).

Reed discloses a conductor device (28), a first plastic component (38), a second molded plastic component (36) are molded (col. 5, lines 4-6), wherein the conductor device is bendable about 90 degrees (Fig 3) such that the first plastic component engage the second plastic component by a snap-in locking device (latch 54)(Fig 12) to form a single integral contacting component (Fig 13)

The teaching as discussed above does not disclose a bending collar.

Janssen et al disclose a bending collar being formed in a second component (44)(Fig 6) for supporting a conductor device (34). It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the bending collar with the contact assembly of Reed for the purpose of supporting the conductor device.

### *Response to Arguments*

Applicant's arguments filed 09-20-2006 have been fully considered but they are not persuasive.

Applicant argues (1) that Reed does not disclose a bending collar, and Janssen et al fails to teach a bending collar.

With respect to (1) Janssen teaches the use of a bending collar (Figs 6, 7). In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

#### **Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
